

WINN Connection

In our journey as a school there came a time when we felt the need to create our own Method. One that would address everything we thought was essential in childhood. This is how the WINN Method was born.

The WINN Method is based on the belief that the human being is composed of four dimensions: the BODY, the HEART, the MIND and the SOUL.

We have created a system that offers the emotional support and the educational environment necessary to connect this four elements on a daily basis, thus guaranteeing the child's full potential.

WINN METHOD

What is a WINN BODY?

The body is the neurological dimension. These are critical ages for neurological development. Each new experience our children live helps create neurological connections.

These connections enable them to have greater corporal and sensorial awareness. The greater this awareness the more security they have. The more security the greater their possibilities become.

They dare. They experiment. They discover. They rest and regroup to start all over again. This is how they are continuously building their neurological network.

WINN ensures that in this neurological building process motorways are created instead of pathways.

¿What is a WINN HEART?

The heart is the psychological dimension.

Our school is our family. Full of love. accompaniment, care and respect. In this familiar atmosphere our aim is to heighten their self esteem enabling them to become autonomous.

The WINN Method creates a safe place where children are free to express all types of emotions. There is room to feel happy, excited, to bond, to feel valuable and safe. There is also room to feel sad, angry or frustrated.

Play, play and more play. Role playing to discover themselves, what they are and what they want to be. All the while building a valuable image of themselves.

¿Qué es una MENTE WINN?

The mind is the dimension of knowledge and creativity.

WINN integrates both hemispheres of the brain to illuminate the path of learning: the left hemisphere (reason and language) and the right hemisphere (image and creativity). The WINN Method makes sure that both hemispheres are fully employed at all times in order to allow maximum learning potential.

Learning takes place both in English and Spanish making WINN a perfect trampoline for a bilingual future. Our pupils fully enjoy the rich diversity of both languages.

When we allow their bodies to move and their hearts to feel, their minds shine. Through programs of stimulation, bits, stories, poems, songs, music, projects of the world and dozens of creative and innovative materials children discover all their multiple intelligences.

¿What is a WINN SOUL?

The soul dimension is that inner space of peace, serenity, wisdom, intuition and light.

To learn from the outside without forgetting what is on the inside. And so live freely enjoying our adventure together in this wonderful planet.

¿What happens when their BODY, their HEART, their MIND and their SOUL are CONNECTED?

They fly. All their possibilities emerge in order to serve themselves and others.

This is our aim as educators and believers in the greatness of human beings. This is the WINN Connection.
